

## DropStop® Securing Kit

First and only disposable securement kit designed to use directly on sterile operating fields. Ensures medical instruments, tubing, and cords stay secure; increasing safety and workflow efficiency, while preventing unnecessary cost from dropped instruments and sterility breaches.

**Designed by Surgeons for Surgeons**

### Performance and Value:

DropStop® Securing Kit is a cost-efficient sterile fastening securement kit designed to safely hold surgical tools in place, preventing sterile items from falling outside the sterile field or onto the patient; preventing burns, costly delays, and potential infections.

- Enhances safety for the patient and staff by promoting hands free transfers
- Optimizes workflow by keeping sterile tools close at hand
- Latex Free
